Recruitment
Process

IIMU's Corporate Relations Team of dedicated professionals oversees the recruitment process. Under their supervision, the Student Placements Committee facilitates all interactions with the companies. A Relationship Manager is assigned to be the specific point of contact for each company.

We encourage companies to visit our campus and conduct the entire process in person. When this is not practical, Skype, video-conferencing and telephonic facilities are available.

Summer Internships

Recruitment starting in October (for first year students)

Summer Internships are eight weeks long and take place during the months of April-May. They are a mandatory requirement of the course.

Pre-placement Presentations
Companies have the option of engaging with the students using pre-placement presentations where they brief them about the projects on offer.

Schedule
The selection process typically begins in the first week of October. Companies are invited to campus based on their convenience and the slot is decided after discussion with the Student Placements Committee.

Placement Process
Typically, the process begins with shortlisting based on the resumes of the students. This is usually followed by group processes like GDs, case studies or written tests, depending on a company's selection policy. The final selections are generally based on one or more rounds of personal interviews. The companies provide a list of the selected students to the Student Placements Committee.

Most companies also indicate the students whom they want to keep on the waiting list, ensuring that both the companies and the students are able to make the most appropriate choice.

Post-placement Process
Companies send official letters to the candidates through the Student Placements Committee. The HR managers then take over and connect the candidates to their project mentors in the company and take them through the induction process.

Summer Internship Review
IIMU is committed to ensuring that students deliver their best performance during the internships. There are three reviews: one at the end of the second week; one midway through; and one at the end of the project.

Pre-placement Offers
Companies have the opportunity to make final job offers to candidates who perform exceptionally well in the internships before the start of the final placement process.

Final Placements

Recruitment starting in November (for second year students)

The Final Placements process is when students are evaluated by prospective recruiters. Students with relevant work experience are generally considered for lateral positions.

Pre-placement Presentations
Companies have the option of using a pre-placement presentation to give students information about their business, vision, work culture and the roles and opportunities available, followed by a Q&A session.

Schedule
The selection process typically begins at the end of November. Companies are invited to campus based on their convenience and the slot is decided after discussion with the Student Placements Committee.

Placement Process
Interested students apply to the company and submit their resumes through the Student Placements Committee. The selection process generally consists of resume-based shortlisting and one or more rounds of personal interviews. Offers, including details of role, location, compensation and other relevant terms and conditions, must be conveyed to the candidate through the Student Placements Committee. The placement process is governed by the Institute's placement rules.

Post-placement Process
Once a company has made an offer as part of the campus placement process, a candidate is bound to accept/reject the offer within a stipulated time frame. When a candidate accepts an offer, he/she automatically opts out of the placement process and ceases to be part of the pool of candidates available to companies.

The candidates are made the offer conditional on their successful completion of the course. The HR managers at the respective companies then take over to guide candidates through the induction and joining process.
