

# Final Placements

Recruitment starting in November (for second year students)

IIM Udaipur's Corporate Relations Team comprising the placement office and the student placement committee oversee the placement process and facilitate all interactions with the companies. A point of contact is assigned to each company from the placement office and the student placement committee. The Final Placements process is when students are evaluated by prospective recruiters. On the spot offers are given to the students that have been selected by the company after the placement process. Students with prior work experience are generally considered for lateral positions.

#### Pre-placement presentations/talks

Companies have the option of using a pre-placement presentation to give students information about their business, vision, work culture and the roles and opportunities available, followed by a Q&A session. The presentation timing would be mutually decided by the institute and the company.

#### Schedule

The preferred mode for hiring (online/offline) can be mutually decided by the company and the placement committee. The placement committee gives the slot for campus hiring after discussion with the company and obtaining details like job descriptions, compensation, etc.

#### Placement process

Interested students apply to the company and submit their resumes through the Student Placements Committee. The selection process generally consists of resume-based shortlisting and one or more rounds of personal interviews. It may also include preliminary rounds like aptitude tests, the actual selection process differs from company to company. The timeline and scheduling of the various rounds can be mutually decided by the placement committee and the company based on prior discussion. Offers, including details of role, location, compensation and other relevant terms and conditions, must be conveyed to the candidate through the Student Placements Committee. Most companies also indicate the students whom they want to keep on the waiting list, ensuring that both the companies and the students are able to make the most appropriate choice. The placement process is governed by the Institute's placement rules.

#### Post placement process

Once a company has made an offer as part of the campus placement process, a candidate is bound to accept the offer within a stipulated time frame. The candidate communicates the decision to the placement committee which in turn conveys it to the company. When a candidate accepts an offer, he/she automatically opts out of the placement process and ceases to be part of the pool of candidates available to companies. We follow the One-offer policy, where a student is removed from any further placement processes of other companies once an offer has been made. The candidates are made the offer conditional on their successful completion of the course. The HR managers at the respective companies then take over to guide candidates through the induction and joining process.
